

JOSHUA JOHN L. CABUNILAS

Parañaque City | 09543045374 | joshuacabunilas20@gmail.com | linkedin.com/in/joshua-cabunilas-0587b8179

PROFESSIONAL SUMMARY

Flutter-focused Mobile Software Engineer with experience building production-grade iOS and Android applications using Flutter/Dart, Clean Architecture, and BLoC state management. Hands-on background in .NET and Next.js development, and L2 technical support. Adept at leveraging modern AI-assisted development tools (Claude Code) to accelerate delivery and code quality.

WORK EXPERIENCE

Ventaja International Corporation

May 2024 – Present

Flutter Mobile Developer

- Contributed to 3+ cross-platform mobile applications (iOS & Android) using Dart, Flutter, Clean Architecture, and BLoC state management.
- Claude Code AI:** Utilize Claude Code AI to accelerate development workflows, improve code quality, and streamline debugging processes.
- Improved application stability, achieving a 60% reduction in app crash rate through systematic debugging and code quality improvements.
- Collaborate with senior developers to design, code, test, and debug features across the stack.
- Write clean, efficient, and well-documented code; participate in code reviews and team planning sessions.
- Key Project – Turbo PH:** Contributed to Turbo, an economical timekeeping solution for manpower agencies at Php 50 per employee per month. Designed for iOS and Android, it replaces unreliable biometric systems and manual processes, tracking employee locations, lateness, absences, and overtime.
- Key Project – PayRemit (payremit.ph):** Contributed to the development of PayRemit, a fintech mobile app (iOS & Android) designed for Filipino and Indian migrant workers (OFWs). The app enables users to pay SSS, Pag-IBIG, and PhilHealth contributions, settle bills, and purchase load — providing a secure and convenient remittance and payment solution powered by Ventaja.

Ventaja International Corporation

November 2023 – May 2024

Junior Software Engineer / L2 Support

- Helped design, code, test, and debug software alongside senior developers across .NET Framework, Next.js, and Flutter.
- Worked with teams to understand requirements and develop features.
- Fixed software defects and debugged issues with team support.
- Provided Level 2 (L2) support — consistently resolving an average of 3 complex technical tickets per week, ensuring timely solutions for clients.
- Wrote clean, efficient, and well-documented code.

Trend Micro

December 2022 – March 2023

GRID DevOps Intern – Core Tech GRID

- Harvest Pattern Creation Via Automation – Created Python scripts for software/applications targeted by the GRID team.
- SCVM Project Data Gathering – Collected specific data on vulnerabilities affecting automotive software.
- Software Vulnerability Research – Researched automation ideas for collecting and processing automotive software vulnerability data.
- Microsoft App Store (Project) – Created CLI scripts to automate download, install, and uninstall of applications from the Microsoft App Store.

EDUCATION

Mapua University

2013 – 2023

Bachelor of Science in Computer Engineering, Specialized in Embedded Systems

Don Bosco Technical Institute Makati (Secondary)

2006 – 2013

Electrical Technology

Don Bosco Technical Institute Makati (Elementary)

2000 – 2006

TECHNICAL SKILLS

Primary – Flutter Mobile Development

- **Flutter & Dart** — production experience building scalable iOS/Android applications
- **Architecture:** Clean Architecture principles for maintainable, testable codebases
- **State Management:** BLoC (Business Logic Component), Cubit, and GetX for efficient application state handling
- **Deployment:** Proficient in building and publishing to both App Store and Google Play

AI-Assisted Development

- **Claude Code** — daily use for code generation, refactoring, and debugging acceleration

Backend & Web

- **.NET Framework** — hands-on experience building robust backend applications
- **Next.js** — experience creating dynamic web applications
- Microsoft SQL Server & Visual Studio
- **AWS** — security group configuration, inbound rule whitelisting, network access management
- **Postman** — API testing and development

Programming Languages

- Dart, C#, C++, Python, JavaScript, Bash/Shell scripting

Embedded Systems & Hardware

- **Arduino Uno and Raspberry Pi** — hands-on project development
- NI LabVIEW embedded systems; HDL programming
- OpenCV (image processing), TensorFlow (machine learning)

Networking & Security

- Network administration: subnets, routing, VLANs, VPN technology
- Configuration of routers, switches, access points, and network security devices
- Cisco Packet Tracer; CCNA certified (Routing & Switching, Bridging)

SOFT SKILLS

- **Team Collaboration:** Strong ability to work effectively with cross-functional teams to understand requirements and deliver solutions.
- **Problem Solving:** Proficient in diagnosing and resolving complex technical issues.
- **Communication:** Excellent at conveying technical concepts to non-technical stakeholders and documenting code clearly.
- **Adaptability:** Able to quickly learn and apply new technologies and methodologies as needed.
- **Resilience:** Capable of working efficiently under pressure and managing multiple tasks to meet tight deadlines.
- **Time Management:** Efficient at prioritizing tasks and managing time to meet deadlines effectively.
- **Critical Thinking:** Able to analyze complex problems, evaluate solutions, and make informed decisions.

CERTIFICATIONS

- SQL for Data Science
- Introduction to Deep Learning & Neural Networks with Keras
- Getting Started with Azure DevOps Boards
- End-to-End Machine Learning with TensorFlow on GCP
- Introduction to Cybersecurity Tools & Cyber Attacks
- Linux Tools for Developers
- Learning Cloud Computing: Cloud Storage
- Learning SQL Server Development on Linux
- Unix Essential Training
- Introduction to Relational Database and SQL
- Fundamentals of Network Communication
- Data Structures
- CCNAv7: Bridging
- CCNA Routing and Switching: Routing and Switching Essentials
- JavaScript Security
- Google Data Analytics
- Google Project Management
- Cybersecurity Essentials

SCHOOL PROJECTS

- Inventory Management System Using Microsoft Visual Studio and Microsoft SQL
- Smart Parking System using HDL
- IoT Smart Parking System using Blynk Application – Embedded Systems
- Predict the Timeline of COVID-19 Herd Immunity in the Philippines using C++
- Temperature Scanner with Automatic Alcohol Dispenser and QR Code for Data Collection
- Detection of Acid-Fast Bacilli (AFB) in Slit-Skin Smear Microscopy Using MASK R-CNN Algorithm

AWARDS & RECOGNITION

- **2nd Best Poster Thesis** – Awarded in the 50th EECE Thesis Colloquium
- **Participation Certificate** – Presentation of Detection of Acid-Fast Bacilli (AFB) in Slit-Skin Smear Microscopy Using MASK R-CNN Algorithm at the 2023 13th International Conference on Biomedical Engineering and Technology (ICBET 2023)
